1999.08.16 – 2001.05.31

On latest position relocated to Beijing for six months, coordinating Nokia.com publishing operations and feature deployments for China, Hong Kong, Taiwan, Australia, New Zealand, Korea and Japan; supporting local Nokia office and their agencies in each location. Also prepared the ramp down of old Nokia.mobi platform and handed over the mobile site operations to new team.

Prior work included various roles within mobile site teams ranging from backend technical roles to being on business owner's team designing the front-end and becoming the go-to guy on all mobile web issues ranging from technical, usability and localization to operational.

Before starting on mobile site, worked on Club Nokia's Photo Zone as project manager and technical contact towards platform vendor in USA.

All roles were global, included traveling and meetings in various Nokia locations with local colleagues and partners in addition to daily communications with people around the globe.
